

A 17TH CENTURY DOUBLE-HEMISPHERE WORLD MAP AS A VOLVELLE

£500.00

Il Globo Terracqueo, rappresentato in due Emisferi, che danno gli Usi, ed operatoni più principali del medismo Globo.

Cartographer CORONELLI, Vincenzo Maria.

Date 1693

Catalogue Catalogue 27: More Than Maps

Stock #: 26353

Publication: Venice, 1693. Sheet 125 x 175mm, with two volvelles, each with a disk and two arms, attached with string as issued.

Condition: Binding stitch holes in bottom printed border.

DESCRIPTION:

A sketch map of the world in two hemispheres on a polar projection, each overlaid with a rotating map disk and one arm for showing longitude and latitude and another for the horizon. In the Northern Hemisphere California is depicted as an island. Under the spheres are the title on a pedestal and two more pointers.

It was published in Coronelli's "Epitome Cosmografica, o Compendiosa Introduttione all'Astronomia, Geografia, & Idrografia", a guide to Astronomy, geography and hydrography, and the use of globes, astrolabes and maps.
