

AN EARLY TOWN PLAN OF WOLVERHAMPTON

A Plan of Wolverhampton Surveyed in MDCCL By Isaac Taylor and Engraved by Thomas Jefferys Geographer to His Royal Highness the Prince of Wales.

Cartographer	<u>TAYLOR, Isaac.</u>
Date	1798
Stock #:	14270
Publication:	London, c.1798. Town plan printed from three plates on one sheet. Total 475 x 600mm.
Condition:	Narrow lateral margins, repairs to binding folds.

DESCRIPTION:

A plan of Wolverhampton in Staffordshire with a large roccoco title cartouche and insets of St. Peter's Collegiate Church and the Wolverhampton Free School in John Street. Among the buildings marked are the Meeting Houses of the Presbyterians and the Quakers.

First published by Jefferys in 1751, this second state comes from a county history published at the end of the century. Originally printed from a single plate, the map is now cut into three vertical strips, presumably because of damage.
