

A 17Th Century Illustration Of The Constellation Of Corona Australis

£380

Additional Information

Cartographer	BAYER, Johann.
Date	1639
Extra Info	[Corona Australis.]
Publication	Ulm: Johann Gorlini, 1639. Coloured, with gold highlights. 285 x 380mm.
Condition	A good example.
References	WARNER: Bayer 1.

Product Description

The constellation of Corona Australis (Southern Crown), engraved by Alexander Mair for Bayer's 'Uranometria', a star atlas that shaped the way the heavens would be perceived for more than two centuries.

Johann Bayer (1572-1625), an Augsburg lawyer, was an amateur astronomer in the years just prior to the invention of the telescope. His most important innovation was a new system of identifying stars by Greek and Roman letters, known today as the Bayer designation. His 'Uranometria' ('Measuring the Sky'), first published 1603, was the first celestial atlas to contain a chart of the stars in the Southern Hemisphere.
