

A 17Th Century Celestial Chart Showing The Ptolemaic Planetary Orbits

£1,000

Additional Information

Dimensions	515 × 440 mm
Cartographer	CELLARIUS, Andreas.
Date	1708
Extra Info	Hypothesis Ptolemaica sive communis, planetarum motus per eccentricos, et epicyclos demonstrans.
Publication	Amsterdam, Schenk & Valk, 1708. Original colour with additions, including gold highlights. 440 x 515mm.
Condition	A good example.
References	KOEMAN: Cel 3.

Product Description

A chart illustrating the apparent planetary motions from Earth in a geocentric Solar System.

This chart was engraved by Jan van Loon and published in the 'Atlas Coelestis; seu Harmonia Macrocosmica', the only celestial atlas to be produced in the Netherlands before the nineteenth century. It was a compilation of maps of the Ptolemaic universe and the more modern theories of Copernicus and Brahe, and remains the finest and most highly decorative celestial atlas ever produced. It was originally published by Jan Jansson in 1660: this chart comes from Schenk & Valk's reissue.
