

Southern Russia from a landmark edition of Ptolemy

BERLINGHIERI, Francesco de Nicola.
Tabula Seconda de Asia.

Florence, 1482. Two sheets joined, as usual, paper size 430 x 560mm.

£6,000

Southern Russia, Ukraine and the Caucasus, from the third edition of Ptolemy's Geography to have printed maps, the first to be printed in the vernacular and the first with 'modern' maps. Francesco Berlinghieri (1440-1501), an Italian scholar and humanist, started work on a revision of Ptolemy in 1464, updating the Ptolemaic maps, supplementing them with modern maps (France, Italy, Spain and the Holy Land) and writing a commentary in Italian verse. The maps were engraved by Niccolò Tedesco, a German printer, unusually equidistant meridians and parallels, and rectangular borders rather than trapezoid. The completed work was published as 'Septe Giornate della Geographia di Francesco Berlinghieri' ('The Seven Days of Geography').
