

18th century vue d'optique of Cartagena

CHEREAU, Jacques.

Vue Generale de Carthagene Ville de l'Amerique Meridionale.

Paris, c. 1780. Original colour. 270 x 405mm.

£280

View of the city of Cartagena or Cartagena de Indias in Colombia, South America. The optical print was made to be viewed through a zograscope, which produced an illusion of depth.
